

Improve Fruit & Vegetable Quality with metarex

- **Long lasting snail & slug control** — pellets remain effective and provide protection for up to four weeks.¹
- **Rain, irrigation & mold resistant** — Metarex pellets hold their shape longer - rainfast up to 45 days (under normal rainfall).
- **Pellet uniformity with no dust** — highly visible pellets do not shatter and offer more baiting points than the same weight of competing products to help assure proper coverage.

* Metaldehyde

¹ when pellets remain

Metarex – for effective control and improved emergence & grade.

*One slug or snail can hatch from 50 to 150 eggs – every 4-6 weeks!
The presence of just one slug or snail can quickly turn into a serious problem.*

Metarex 4%* Slug & Snail Bait:

- **Lasts long** – features reduced rate technology protecting up to four weeks for an efficient baiting program.
- **High quality = quick attraction** – offers immediate protection to plants. Preferred by slugs/snails 3-to-1 over vegetables**
- **Rain, irrigation & mold resistant** – up to 45 days (under normal rainfall).

Feeding damage to vegetables.

Slug damage to tomatoes. Snail damage to greens.

Metarex Weatherability

Elapsed time: 24 hours
Conditions: Open Petri dish, 20mL water

Elapsed time: 16 days, Rainfall 1.6"
Glenn Fisher Oregon State Univ., Corvallis

Metarex Mold Resistance

Metarex resists mold a long time.
10 days, Photo: prominent Calif. Nursery.

- **Weatherability** – active ingredient is homogeneously blended throughout the hardened pellet - so they hold their shape a long time.
- **Reduced rate technology** – fewer bags to store and less frequent reloading of application equipment.
- **Plentiful baiting points** – more than the same weight of competing products (slugs/snails have to travel less to reach the bait – especially less-mobile juvenile slugs/snails).

Metarex Uniformity

No dust & consistent size*** enables consistent flow, reduced “clogs” & waste and easy equipment clean-up.

Wet Process Mfg'd.***

*** 92% of pellets exactly the same 2.5mm size <8% variance: 2.4 or 2.6mm; Bulk density = 49 lb/ft³
