

Protect Citrus Quality and Grade with **metarex**

- **Long lasting snail control** — pellets remain effective and provide protection for up to four weeks.¹
- **Rain, irrigation & mold resistant** — Metarex pellets hold their shape longer – rainfast up to 45 days (under normal rainfall).
- **Pellet uniformity with no dust** — highly visible pellets do not shatter and offer more baiting points than the same weight of competing products to help assure proper coverage.

Kills Snails Fast™

item #80000767

* Metaldehyde

¹ when pellets remain

Metarex – for effective control and improved grade.

*Just one snail can hatch from 40 to 85 eggs – every 4-6 weeks!
The presence of just one snail can quickly turn into a serious problem for your grove.*

Metarex 4%* Slug & Snail Bait:

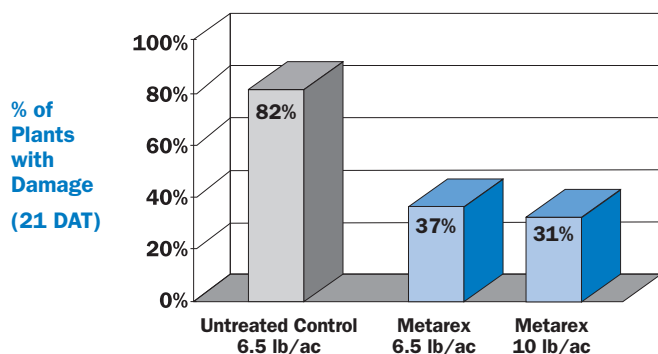

- **Lasts long** – features reduced rate technology protecting up to four weeks for an efficient baiting program.
- **High quality = quick attraction** – promotes early feeding and fast control. Preferred by snails 3-to-1 over vegetables**
- **Reduced rate technology** – fewer bags to store and less frequent reloading of application equipment.

Snail feeding damage to citrus.

Metarex – Reduced Rate Technology

% Damage to Citrus/Vegetables¹

¹Trials done on snail cohorts (n = 25 ea.), in citrus groves. Lettuce used since it is easier to measure degrees of damage on lettuce than on citrus. Citrus (Lemon and Grapefruit) Trial No. 291-04. Dr. Reed L. Kirkland PhD., BioResearch Ltd. Fresno, CA

Metarex Mold Resistance

*Metarex resists mold a long time.
10 days, Photo: prominent Calif. Nursery.*

Metarex Weatherability

*Elapsed time: 24 hours
Conditions: Open Petri dish, 20mL water*

*Elapsed time: 16 days, Rainfall 1.6"
Glenn Fisher Oregon State Univ., Corvallis*

- **Weatherability** – active ingredient is homogeneously blended throughout the hardened pellet - so they hold their shape a long time.
- **Rain, irrigation & mold resistant** – up to 45 days (under normal rainfall).
- **Plentiful baiting points** – more than the same weight of competing products (snails have to travel less to reach the bait – especially less-mobile juvenile snails).

Metarex Uniformity

No dust & consistent size*** enables consistent flow, reduced “clogs” & waste and easy equipment clean-up.

*Wet Process Mfg'd. ****

*** 92% of pellets exactly the same 2.5mm size <8% variance: 2.4 or 2.6mm; Bulk density = 49 lb/ft³

* Metaldehyde
** Carrots and lettuce
